

2026 PRODUCT RANGE CATALOGUE

Performance *additives for plastics.*

Ready-branded products in sealed original manufacturer packaging.
Wholesale supply to processors, manufacturers and commercial buyers.

OUR SUPPLY MODEL

Original product. Original packaging. Original manufacturer identity. RichBond does not manufacture, formulate, blend, decant, relabel, repackage or otherwise alter the products it supplies.

Ready-branded means exactly that.

RichBond resells finished branded performance additives in their sealed original manufacturer packaging. Brand, grade, pack size, quantity and availability are confirmed in writing before an order is agreed.

WHAT WE SUPPLY

01

Finished branded additives in sealed manufacturer bags, pails, drums or other original pack formats.

WHAT WE DO NOT DO

02

No manufacturing, formulation, blending, decanting, relabelling, repacking or product alteration.

HOW AVAILABILITY WORKS

03

Tell us the exact manufacturer, brand, grade, original pack size and quantity required.

Six ready-branded additive categories.

Each enquiry is handled against the exact manufacturer product or grade requested.

01

Processing aids

Ready-branded processing-aid grades supplied against the exact manufacturer and product reference requested.

02

UV stabilisers

Finished branded grades for ultraviolet-protection requirements, supplied in sealed original manufacturer packs.

03

Antioxidants

Ready-branded antioxidant products, subject to brand, grade, original pack size and quantity availability.

04

Impact modifiers

Original branded modifier grades supplied without formulation, repacking or alteration by RichBond.

05

Slip and antiblock

Sealed manufacturer products for film and surface-performance requirements, supplied as received.

06

Flame retardants

Ready-branded flame-retardant grades supplied with manufacturer documentation where available.

Ready-branded product types.

Use the reference to structure an enquiry, then state the required manufacturer, brand and exact grade.

CATEGORY 01

Processing aids

- | | |
|-------|----------------------------------|
| PA-01 | Acrylic processing aid |
| PA-02 | Polymer processing aid |
| PA-03 | Flow and extrusion aid |
| PA-04 | Melt-strength aid |
| PA-05 | Mould and metal-release additive |
| PA-06 | Lubricant and dispersion aid |

Exact product, original pack size and availability are confirmed by quotation.

CATEGORY 02

UV stabilisers

- | | |
|-------|------------------------------|
| UV-01 | Low-molecular-weight HALS |
| UV-02 | High-molecular-weight HALS |
| UV-03 | Benzotriazole UV absorber |
| UV-04 | Benzophenone UV absorber |
| UV-05 | Combined UVA and HALS system |
| UV-06 | Light-stabiliser blend |

Exact product, original pack size and availability are confirmed by quotation.

RichBond supplies finished branded products in sealed original manufacturer packaging only.

Ready-branded product types.

Use the reference to structure an enquiry, then state the required manufacturer, brand and exact grade.

CATEGORY 03

Antioxidants

AO-01 Hindered phenolic primary antioxidant

AO-02 Aromatic amine primary antioxidant

AO-03 Phosphite secondary antioxidant

AO-04 Thioester secondary antioxidant

AO-05 Primary and secondary antioxidant blend

AO-06 Multifunctional stabiliser

Exact product, original pack size and availability are confirmed by quotation.

CATEGORY 04

Impact modifiers

IM-01 Acrylic impact modifier

IM-02 MBS impact modifier

IM-03 Core-shell impact modifier

IM-04 Low-temperature impact modifier

IM-05 Weatherable impact modifier

IM-06 Biopolymer impact modifier

Exact product, original pack size and availability are confirmed by quotation.

RichBond supplies finished branded products in sealed original manufacturer packaging only.

Ready-branded product types.

Use the reference to structure an enquiry, then state the required manufacturer, brand and exact grade.

CATEGORY 05

Slip and antiblock

SA-01 Slip additive

SA-02 Antiblock additive

SA-03 Combined slip and antiblock additive

SA-04 Denesting additive

SA-05 Release additive

SA-06 Surface-friction modifier

Exact product, original pack size and availability are confirmed by quotation.

CATEGORY 06

Flame retardants

FR-01 Halogen-free phosphorus flame retardant

FR-02 Brominated flame retardant

FR-03 Reactive flame retardant

FR-04 Polymeric flame retardant

FR-05 Flame-retardant synergist

FR-06 Intumescent flame-retardant system

Exact product, original pack size and availability are confirmed by quotation.

RichBond supplies finished branded products in sealed original manufacturer packaging only.

Processing aids

Ready-branded processing-aid grades supplied against the exact manufacturer and product reference requested.

PRODUCT TYPES

Typical enquiry terms

- Polymer processing aids
- Flow and extrusion aids
- Mould-release additives
- Lubricant and dispersion aids

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Extrusion and conversion
- Surface-quality control
- Processing-efficiency requirements
- Application-specific manufacturer grades

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

UV stabilisers

Finished branded grades for ultraviolet-protection requirements, supplied in sealed original manufacturer packs.

PRODUCT TYPES

Typical enquiry terms

- Hindered amine light stabilisers
- UV absorbers
- Combined stabiliser systems
- Application-specific light-stability grades

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Outdoor components
- Film and sheet
- Moulded products
- Colour and property retention

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

Antioxidants

Ready-branded antioxidant products, subject to brand, grade, original pack size and quantity availability.

PRODUCT TYPES

Typical enquiry terms

- Primary antioxidants
- Secondary antioxidants
- Blended stabiliser products
- Thermal-processing stabilisers

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Processing protection
- Long-term heat stability
- Polymer property retention
- Application-specific manufacturer grades

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

Impact modifiers

Original branded modifier grades supplied without formulation, repacking or alteration by RichBond.

PRODUCT TYPES

Typical enquiry terms

- Acrylic impact modifiers
- Elastomeric modifier grades
- Core-shell modifier products
- Resin-specific branded grades

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Rigid polymer applications
- Low-temperature performance
- Toughness requirements
- Application-specific impact performance

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

Slip and antiblock

Sealed manufacturer products for film and surface-performance requirements, supplied as received.

PRODUCT TYPES

Typical enquiry terms

- Slip additive products
- Antiblock additive products
- Combined slip-antiblock grades
- Surface-performance additives

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Film conversion
- Handling and winding
- Surface-friction requirements
- Packaging-film applications

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

Flame retardants

Ready-branded flame-retardant grades supplied with manufacturer documentation where available.

PRODUCT TYPES

Typical enquiry terms

- Halogen-free product ranges
- Phosphorus-based grades
- Mineral flame-retardant products
- Synergist and smoke-suppression grades

These are category descriptions, not substitute grade recommendations. Please specify the exact branded product required.

COMMON APPLICATION AREAS

What buyers may specify

- Electrical and technical components
- Building-product applications
- Transport applications
- Grade-specific compliance requirements

REQUIRED FOR A QUOTATION

Manufacturer or brand | Exact product or grade | Original pack size
Quantity | Delivery destination and target date | Required documents

From exact product request to written quotation.

01

Tell us the exact product

Include the manufacturer or brand, product or grade, original pack size, quantity, destination and target date.

02

We review availability

RichBond checks whether the requested ready-branded product can be offered in its sealed original packaging.

03

You receive written terms

The quotation sets out price, minimum quantity, original manufacturer pack size, payment and delivery details.

Manufacturer technical and safety documents can be provided where available.

The buyer remains responsible for confirming product suitability for its intended application.

REQUEST A FORMAL QUOTATION

Tell us the exact *branded grade you need.*

Include manufacturer or brand, product or grade, original pack size,
quantity, delivery destination, target date and document requirements.

RICHBOND CO LIMITED
